

# DECLARATION

I declare that as the supplier of calves intended for human food, this Bobby Calf Status Declaration is true and accurate, and that

- I have read, understand and agree that I must abide by the requirements set out. Unless I advise Blue Sky Meats (NZ) Limited of any change prior to that date, this declaration will remain valid until 1st December 2020
- I/We agree to abide strictly by requirements in the Animal Welfare Care and Procedure Regulations 2018 and the Code of Welfare for Dairy Cattle, Transport Code of Welfare (re selection of calves for transport) as required by the Ministry for Primary Industries (MPI). The regulatory requirements and the codes are available at:  
[www.mpi.govt.nz/protection-and-response/animal-welfare/codes-of-welfare](http://www.mpi.govt.nz/protection-and-response/animal-welfare/codes-of-welfare)
- I/We agree to feed the calves within two hours of the notified pick up.
- I/We agree to record the time of last feed
- I/We agree to hold these records in a secure place for a period of two years for assessment purposes

## NOTES

- Note 1** Calves treated directly with any antimicrobial agent (e.g. antibiotic or sulpha drugs) must not be submitted for slaughter. Treatment with an approved electrolytic which is labelled to indicate that there is no withholding period is permitted.
- Note 2** Where a pregnant cow has been treated with any animal remedy and calves before that meat withholding period of the product has elapsed, then the calf may not be submitted for slaughter until the cow becomes eligible for slaughter.
- Note 3** Calves may be indirectly exposed to chemical residues if they are fed milk from a treated cow. If calves are exposed to chemical residues via cows milk, they are not fit for slaughter until after the expiry of the meat withholding period of any cow providing milk.
- Note 4** Residue Movement Control: When animals at slaughter are found to exceed the permissible limit for any animal remedy, pesticide or other contaminant, MPI will place the risk source farm under movement control. This prevents the movement of animals off the farm without a MPI permit. If your farm is under movement control you must inform the slaughter facility before submitting any calves for slaughter.
- Note 5** TB Movement Control if your farm is under TB Movement Control, or has been under TB Movement Control within the last 6 months, you must inform the slaughter facility and double ear tag.
